

AISSAM BOUDROUZ

Economist | Applied Econometrics | Macroeconomic & Policy Analysis

Gatineau-Ottawa, Canada | +1 579-348-0892 | boudrouzaissam@gmail.com | Permanent Resident of Canada

PROFESSIONAL PROFILE

Economist and applied researcher specialized in macroeconomic analysis, applied econometrics, quantitative modeling, and policy-oriented research. Strong experience building datasets, indicators, econometric models, dashboards, and analytical reports for public-sector and research environments. Skilled in translating complex economic and financial data into clear insights for decision-making. PhD candidate in Economics at Cadi Ayyad University and MBA candidate at the University of Quebec, with strong technical skills in Python, EViews, Stata, R, SQL, Excel, Streamlit, and Power BI.

CORE COMPETENCIES

Macroeconomic & financial analysis	Financial stability, inflation, FDI, institutions, market, and policy analysis
Econometrics & modeling	ARDL/ECM, VAR/SVAR, ARIMA, panel data, DiD, Oaxaca-Blinder, forecasting
Data analytics & dashboards	Python, pandas, Streamlit, Power BI, Excel, SQL; data cleaning, visualization, reporting
Policy communication	Technical notes, research outputs, briefing-style summaries, presentations for varied audiences

TECHNICAL SKILLS

- Econometrics & quantitative methods: ARDL, ECM, VAR/SVAR, ARIMA, panel data models, Difference-in-Differences, Oaxaca-Blinder decomposition, forecasting, diagnostic tests, scenario analysis.
- Software & programming: Python, pandas, statsmodels, Streamlit, Plotly, Stata, R, EViews, SPSS, Excel advanced, MySQL/SQL, Power BI.
- Languages: French fluent | English professional working proficiency.

PROFESSIONAL EXPERIENCE

- Supply Teacher** | *Centre de services scolaire des Portages-de-l'Outaouais (CSSPO)* | Gatineau | Nov 2024 - Present
- Deliver structured learning activities and communicate complex concepts clearly to diverse learners.
 - Strengthen presentation, adaptation, and stakeholder communication skills in a public-sector environment.
- Freelance Economic Consultant - Empirical Studies** | *Independent projects* | Morocco, France, Spain | 2020 - 2024
- Conducted quantitative economic studies for academic, research, and consulting projects using time-series, panels, and cross-sectional datasets.

- Designed empirical strategies and econometric models, including ARDL/ECM, forecasting, causal analysis, and decomposition methods.
- Built, cleaned, and documented datasets; performed regression analysis, diagnostic testing, and policy-oriented interpretation.
- Prepared technical notes, research summaries, and decision-oriented outputs, translating quantitative results into clear recommendations.

Economist & Statistics Officer | *Ministry of Justice* | Morocco | May 2021 - Oct 2024

- Designed performance indicators, analytical dashboards, and reporting tools to support senior management and institutional monitoring.
- Analyzed large administrative datasets on flows, productivity, efficiency, and operational trends.
- Developed advanced Excel-based monitoring systems and contributed to data quality, consistency, and analytical reliability.
- Produced strategic analytical reports supporting organizational, operational, and policy decisions.

Economic Research Intern | *Ministry of Economy and Finance* | Rabat | Mar - Jun 2020

- Conducted economic analysis on African economic integration and the African Continental Free Trade Area.
- Developed econometric simulations and composite indicators to support policy and market assessment.

SELECTED PROJECTS

Policy Mix & Inflation in Morocco | Python, Streamlit, macroeconometrics, policy analysis | [Open Streamlit dashboard](#)

- Built an interactive dashboard presenting empirical analysis on policy mix and inflation dynamics in Morocco.
- Used time-series and macroeconomic modeling tools to support policy-oriented interpretation and research communication.

Morocco FDI & Institutions - Dynamic ARDL Dashboard | Python, Streamlit, EViews, econometrics | [Open Streamlit dashboard](#)

- Developed an interactive dashboard analyzing the relationship between FDI, institutional quality, and macroeconomic variables in Morocco using ARDL/ECM methods.
- Integrated model diagnostics, visualizations, and short-run/long-run policy interpretation.

Renewable Energy Risk Matrix in Africa | Python, Streamlit, risk analysis, data visualization | [Open Streamlit dashboard](#)

- Built a country-level risk matrix for renewable energy investment using governance, infrastructure, energy access, fossil fuel subsidy, logistics, and vulnerability indicators.
- Created quartile-based risk classifications and visual outputs by country, region, and income group.

RESEARCH, PUBLICATIONS AND CONFERENCE

- Conference Presentation - University of Ottawa, 2026: Institutional performance and attractiveness of foreign direct investment in Morocco; dynamic ARDL framework with short-run and long-run interpretation; represented Cadi Ayyad University.
- An Ex-Ante Approach to the Profitability of a Customs Union, IJRISS, 2023.
- Structural and Behavioural Drivers of Sheep Prices in Morocco (2023-2024): An Oaxaca-Blinder Approach - [ResearchGate publication](#).
- International conference presentation, ICRSAE 2023.

EDUCATION

- PhD Candidate in Economics, Applied Macroeconomics - Cadi Ayyad University, Morocco, in progress.
- MBA, University of Quebec, Canada, expected 2026.
- Master's Degree in Applied Economics - Hassan II University, Morocco; WES recognized in Canada.

CERTIFICATIONS

- IMF - Macroeconomic Diagnostics.
- IMF - Monetary and Financial Statistics.
- Google Data Analytics Certificate.
- Business Analytics with Excel.
